WINTERS INSTRUMENTS
MANUFACTURER OF INDUSTRIAL INSTRUMENTATION

WINTERS GAUGE AUDIT PROGRAM (G.A.P.)

Step #1

Define Scope

- Identify location of instrumentation
- Determine proper applications and requirements (normal operating pressures and temperatures)
- Document known or regular installation issues

Step #2

Conduct Audit

- Record instrument types, part numbers and tags
- Document pressure and temperature readings
- Record working and failed instrumentation
- Review applications and requirements
- Record inventory

BENEFITS OF G.A.P.

Reduce service interruptions

Improperly specified gauges and thermometers can cause equipment to prematurely wear leading to unscheduled maintenance interruptions. A G.A.P. will ensure the correct instrument is specified reducing these interruptions.

Improve safety

A malfunctioning gauge or thermometer can lead to catastrophic failure of equipment. By ensuring all instruments are working properly, a G.A.P. can help you improve workplace safety.

Save on inventory costs

Without knowing what is installed in your plant, inventory planning becomes unmanageable. This results in the stocking of incorrect product. A G.A.P. will identify your most installed instruments allowing you to correctly plan and consolidate your inventory, resulting in cost savings.

Step #3

Report Findings

- Evaluate installed instrumentation

- Notify of corrective actions (if required)

- Recommend replacement parts

- Explanation of preventative measures

- Demonstrate proper instrumentation care and maintenance

- Develop a plan to reduce service interruptions, improve safety and save on inventory costs

WE'LL DO THE WORK.
YOU'LL GET THE RESULTS.

WINTERS INSTRUMENTS

MANUFACTURER OF INDUSTRIAL INSTRUMENTATION

Winters Instruments is a global manufacturer of premium quality pressure and temperature instrumentation, with distribution partners in over 90 countries. Please contact us for your nearest Regional Manager.

Corporate - Canada
Winters Instruments
121 Railside Road
Toronto, Ontario
